## PROFESSIONAL SUMMARY

Frontend Engineer with 1 year of full-time experience and 1 year of internship at a SaaS product company, building responsive, high-performance web applications using React.js and Next.js. Improved app performance, delivered key features from scratch, and reduced production bugs through clean, maintainable code. Focused on fast learning, collaborative teamwork, and growing into impactful frontend engineering challenges.

## WORK EXPERIENCE

### SuperOps

June 2025 – Present

*Junior Frontend Engineer*

*Chennai, India*

- Spearheaded migration of a **customer-facing React app to Next.js** with **Redux** state management, enabling **server-side rendering**, improving page load performance and reducing long-term technical debt.
- Delivered **Agent Marketplace** driving **25–50% growth** in AI agent adoption; integrated **Algolia semantic search** with AI-powered recommendations, improving content discoverability.
- Improved **Core Web Vitals** by **50–70%** via async rendering and lazy loading; engineered **signup and demo pages** with **ZeroBounce** integration blocking **100+ spam signups**.
- Accelerated development speed by **50%+** leveraging **AI-assisted workflows** (Cursor, Claude Code, Figma MCP), enabling faster feature releases and reduced iteration cycles.

### SuperOps

July 2024 – May 2025

*Frontend Engineer Intern*

*Chennai, India*

- Integrated **HubSpot API** for MSP Assessment page serving **200+ MSP participants**, enabling dynamic data pulling, real-time content rendering, and data-driven growth analysis.
- Developed **Tech Hub (IT Glossary)** with **150+ pages** using **Algolia-powered** search, tag filtering, auto-generated Table of Contents, and **AI-based topic summarization**.
- Automated **noindex tagging**, **Schema Markup** generation via Hygraph, and **internal linking across 46 pages**, reducing manual SEO overhead by **60%**.
- Migrated **Google Captcha v3 to Enterprise** across all signup flows, reducing bot submissions by **90%+**; conducted **POCs** on ZeroBounce, Kickbox, and geo-based HelloBar (IPStack).

## PROJECTS

**Internal Employee Portal** | *Next.js, Tailwind CSS, JavaScript*

SuperOps Internal

- Independently designed and launched an internal portal used by **150+ employees**, enabling meeting room booking and company-wide announcements, eliminating manual coordination overhead.

**Resume Ingestion & CRM Pipeline** | *React.js, REST APIs*

SuperOps Internal

- Engineered an automated resume pipeline processing **10–20 resumes/week**; uploads auto-pushed to **CMS**, converted to shareable links, and forwarded to **CRM** — eliminating manual HR effort entirely.
