# Disclaimers

## General

Bitmine Immersion Technologies, Inc. ("BMNR") is making this presentation available in connection with an update on its business operations and strategies. The information contained in this presentation does not purport to be complete or to be all-inclusive or to contain all of the information that prospective investors may require. Prospective investors are encouraged to conduct their own analysis and review of information contained in this presentation as well as important additional information through the Securities and Exchange Commission's ("SEC") EDGAR system at [www.sec.gov](http://www.sec.gov) and on our website at [www.bitminetech.io](http://www.bitminetech.io).

## Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable securities laws. All statements other than statements of historical fact are forward-looking statements, including, but not limited to, statements regarding the Company's future financial position, business strategy, budgets, projected costs, and plans and objectives of management for future operations. Words such as "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project," "will" "would," "could," "should" and similar expressions are intended to identify forward-looking statements. In addition, any statements that refer to projections, forecasts, or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. Forward looking statements in this presentation may include risks and certainties which are provided to you and indicated from time to time as described in BMNR's most recent Forms 10-K, 10-Q, and 8-K filed or furnished with the SEC. You should also carefully consider the risks and uncertainties described and the information presented in or incorporated by reference into BMNR's registration statement on Form S-3ASR filed July 9, 2025 and in subsequent current, quarterly, and annual reports filed with or furnished with the SEC. These filings or potential filings may identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements referred hereto. These statements are based on current expectations, estimates and projections about the industry and markets in which the Company operates, as well as management's beliefs and assumptions. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Actual results may differ materially from those expressed or implied in the forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

## No Offer or Solicitation

This presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the Company, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

## Third-Party Information

Certain information contained in this presentation has been obtained from published and non-published sources prepared by third parties, which in certain cases have not been independently verified. While such information is believed to be reliable, the Company makes no representation or warranty, express or implied, as to the accuracy or completeness of such information.

## The crypto market has seen \$1 trillion in value erased in this month's plunge into bear territory

By [Samuel O'Brient](#)

- Bitcoin cratered on Thursday, leading risk assets lower after a big U-turn in the stock market.
- The crypto meltdown has wiped out over \$1 trillion in market value since early October.
- Macro and technical factors are weighing on digital assets, pushing bitcoin deeper into bear territory.

# Tokenization: 5 reasons for the “big unlock”

- **Fractional Ownership:** Tokenization divides equities into affordable fractions, broadening access to high-value investments.
- **Reduced Costs and Efficiency:** Tokenization automates processes, cuts intermediaries, lowers fees, speeds settlements, and simplifies trading vs. traditional methods.
- **24/7 Global Trading:** Tokenized equities enable round-the-clock trading on decentralized platforms, ignoring market hours or borders.
- **Enhanced Transparency and Security:** Blockchain offers immutable ownership records, cutting fraud and boosting trust via tamper-proof data.
- **Increased Liquidity:** Tokenization eases blockchain trading, turning illiquid assets into quick buys/sells to attract more investors.

# Larry Fink and Rob Goldstein on how tokenisation could transform finance

Ledgers haven't been this exciting since the invention of double-entry book-keeping

Now finance is entering the next major evolution in market infrastructure—one that could move assets faster and more securely than systems that have served investors for decades.

# ETH/BTC ratio: 2025 tailwinds argue for ATH in ratio

## ETH outperformance expected

- Worse-than-expected BTC performance has lowered prospects for all digital assets
- However, ETH's specific drivers have improved; we see ETH-BTC returning to its 2021 highs
- We lower our year-end ETH-USD forecasts for 2026-28 to reflect broader weakness in digital assets
- We raise our longer-term ETH-USD forecasts, and we see the price reaching 40,000 by end-2030

### ETH-BTC set to head back to 2021 highs

The outlook for Ethereum (ETH) has shifted since our last forecast update in August 2025 (see *Ethereum – Forecast upgrade*). In an absolute sense, weaker-than-expected Bitcoin (BTC) performance has dampened prospects for all digital assets against the USD given Bitcoin's continued dominance of the sector. In relative terms, however, we think ETH's prospects have improved. We therefore expect the cross to gradually return to its 2021 highs.
